December 2021

Dear Parent/Carer

You may already have seen that our new and updated website has gone live. The new website includes a number of changes, one being the navigation of the site and dropdown menus.

In addition, we have also improved the structure of our content so that there are a whole host of smaller but impactful changes to make your experience of the website that much better for you.

Curriculum Overview

In line with the adaptations to changes to the curriculum you will find all the information you need, including our curriculum intent and subject overviews. This will enable you to see what your child will be studying.

The Head of Department for each subject works closely with their team, and with their dedicated Directors, to ensure a carefully planned and mapped curriculum is in place across a 5 year period (three years for Key Stage 3, two years Key Stage 4), or a 2 year curriculum for open element option subjects.

By using the dropdown menu on the website you are able to select each subject area. Here you will explore the importance of each subject's curriculum and how it is planned and delivered. Each subject provides a narrative or a journey of study detailing the what, why and how of its content and assessment.

Within the core subject areas, English, maths and science, it clearly shows what your child is studying by year group and by each half term. This will assist how you may track them and support them in their learning journey.

For curriculum intent use the following link:
